

Roberto Vallado

✉ contact@robertovallado.dev | 📍 Québec, QC, Canada | 🔗 <https://github.com/RobertoVallado>

Full-stack .NET developer with five years of production experience in C# / .NET and Angular. The foundation is shipping software that works: features, APIs, databases, deployment pipelines, the full delivery chain. What I bring on top is the layer most developers treat as someone else's problem: a genuine understanding of how software breaks and how to build it so it doesn't. I hunt real vulnerabilities on Bugcrowd, built an SBOM pipeline to catch vulnerable dependencies before they reach production, and am working towards a CCNA to close the gap between writing code and understanding what can go wrong underneath it. Most recently team lead: drove architecture decisions, mentored four developers, and owned QA and DevOps in a lean team with no dedicated specialists. Former instructor. Fluent in English, French, Portuguese and Spanish.

Experience

Bugcrowd

FREELANCE SECURITY RESEARCHER

July 2023 – Present

- Hunt for vulnerabilities in web apps and REST APIs using OWASP methods, manual testing and custom tooling.
- Found and reported several real-world security vulnerabilities with clear, reproducible write-ups that helped teams fix them quickly.

SSM Innovation Centre

INTERMEDIATE SOFTWARE DEVELOPER

June 2023 – June 2026

- Led technical direction for the development team, owning architecture decisions, code quality standards and delivery across multiple active projects.
- Mentored a team of 4 developers, including a summer student, through code reviews, pair programming and one-on-ones.
- Reduced xUnit integration test run times by 20% in CI/CD pipelines, shortening feedback loops and improving throughput for the whole team.
- Built and owned an SBOM pipeline to continuously audit all third-party library dependencies, surfacing vulnerable packages before they reached production and reducing supply-chain risk across our projects.
- Designed and implemented custom ASP.NET Core middleware and built attribute-driven audit tables to automatically capture and persist security-relevant user actions across multiple services, improving traceability and supporting compliance requirements.
- Wrote and optimized complex MSSQL stored procedures and views to encapsulate business logic and support reporting requirements, reducing ad-hoc query complexity in the application layer and improving data access performance across services.
- Filled QA and DevOps gaps in a lean team with no dedicated specialists, taking ownership of test strategy, CI/CD configuration and deployment pipelines alongside regular feature delivery, gaining hands-on breadth across the full stack.

Sault College

WEB APPLICATIONS & BUSINESS APPLICATIONS INSTRUCTOR

September 2023 – June 2024

- Designed and taught Web Applications and Business Applications Development courses to cohorts of 30–35 students.
- Kept strong completion rates by adapting to different learning styles and backgrounds.
- Regularly updated course content to keep it current with industry tools and practices.

SSM Innovation Centre

JR PROGRAMMER

January 2022 – June 2023

- Ramped up on a complex C# / .NET codebase and was contributing features and fixes within the first few weeks.

- Diagnosed and extended complex MSSQL stored procedures and views, tracing data issues across multiple tables and service layers.
- Solved complex technical problems independently, drawing on solid knowledge of algorithms, data structures and debugging.

Sault College

COMPUTER PROGRAMMING TUTOR

September 2021 – April 2022

- Tutored Computer Programming students one-on-one and in small groups, helping them fill knowledge gaps and improve their grades.
- Identified each student's gaps and tailored sessions accordingly.
- Built good relationships with students and faculty, and helped keep at-risk students engaged and on track.

SSM Innovation Centre

JR SOFTWARE DEVELOPER (CO-OP)

April 2021 – September 2021

- Built production-ready features in C# and Angular from early on in the placement.
- Jumped into code reviews and QA processes from day one.

Education

Cisco

CERTIFICATION IN CCNA

In Progress

Cégep Limoilou

AEC IN DÉVELOPPEMENT D'APPLICATIONS SÉCURITAIRES

April 2026

Completed April 2026

Sault College

ONTARIO DIPLOMA IN COMPUTER PROGRAMMING

April 2022

Overall GPA 3.8

Skills

Backend

C#, .NET, Python, Python Automation, REST APIs, Node.js

Frontend

Angular, React, Next.js, TypeScript

Databases

MSSQL, Stored Procedures & Views, PostgreSQL, MySQL, Entity Framework

DevOps & Tools

Docker, Terraform, GitHub Actions, Git, Linux, Azure

Security

Bug Bounty, Vulnerability Research, Penetration Testing, OWASP, Burp Suite, SBOM, CCNA (in progress)

Stats

Designed and implemented an SBOM pipeline at SSM Innovation Centre to proactively identify and remediate vulnerable third-party libraries, embedding supply-chain security into the team's delivery process before it became an industry mandate.

Active bug bounty researcher on Bugcrowd, finding and reporting real-world security vulnerabilities in REST APIs and web apps. 🐞

Completed a Secure Application Development AEC at Cégep Limoilou in April 2026, building formal cybersecurity foundations alongside active bug bounty research.

Returned to teach at Sault College just a year after graduating from the same program, designing and delivering Web Applications and Business Applications courses.

Graduated with a 3.8 GPA from Sault College Computer Programming Diploma.

Fluent in English, French, Portuguese and Spanish, able to work across Canada, the US and Latin America without a language barrier.

Awards

ADnet Award in Memory of Wilfred Lefresne (2022) - Awarded by ADnet (Algoma District Community Network) to Information Technology students demonstrating volunteerism, leadership, and innovation.

President's Academic Excellence Scholarship (2021) - Awarded by Sault College for outstanding academic performance.

ADnet Award in Memory of Wilfred Lefresne (2021) – Awarded by ADnet (Algoma District Community Network) to Information Technology students demonstrating volunteerism, leadership, and innovation.
