✉ contact@robertovallado.dev | 📍 Québec, QC, Canada | 🔗 <https://github.com/RobertoVallado>

Full-stack software developer with over five years of experience building reliable, secure applications in C# / .NET and Angular. I bring an active security perspective from bug bounty research on Bugcrowd — hunting real-world vulnerabilities in REST APIs — a mindset that directly shapes how I design systems, review code, and think about resilience every day. Beyond traditional development, I am actively exploring agentic AI: building LLM-powered automation workflows that help teams and individuals accomplish more with less friction. I also do freelance web development and SEO consulting for marketing professionals and businesses in Mexico, bridging technical depth with practical digital growth strategy. As a team lead and former instructor, I communicate clearly, mentor effectively, and deliver. Fluent in English, French, Portuguese and Spanish — I bring a genuinely international perspective and collaborate naturally across cultures and markets.

Experience

Bugcrowd

FREELANCE SECURITY RESEARCHER

July 2023 – Present

- Actively hunt for vulnerabilities across web applications and REST APIs using OWASP methodologies, manual testing and custom tooling.
- Identified and responsibly disclosed multiple real-world security vulnerabilities, producing clear reproduction-ready reports that enabled rapid remediation.
- Developed a security-first code review mindset that directly improves resilience and trust boundaries in day-to-day development work.

SSM Innovation Centre

INTERMEDIATE SOFTWARE DEVELOPER

June 2023 – Present

- Lead day-to-day technical direction for the development team — driving architectural decisions, code quality standards, and on-time delivery across active projects.
- Mentor junior and intermediate developers through code reviews, pair programming and technical coaching, measurably improving team throughput and confidence.
- Diagnose and resolve performance bottlenecks and defects across a C# / .NET codebase, consistently reducing time-to-resolution and improving system reliability.
- Own project planning and milestone estimation in close collaboration with project managers, keeping stakeholders aligned and delivery predictable.
- Champion long-term maintainability in every architectural decision — evaluating trade-offs between scalability, performance and team velocity.

Freelance

WEB DEVELOPER & SEO CONSULTANT

January 2023 – Present

- Design, build and optimize websites for marketing professionals and small businesses in Mexico and Latin America, focusing on performance, UX and conversion.
- Apply SEO best practices including on-page optimization, structured data (Schema.org), Core Web Vitals tuning and keyword strategy to measurably grow organic traffic.
- Integrate agentic AI and automation workflows (content pipelines, lead capture, analytics dashboards) to amplify marketing outcomes with minimal overhead.
- Advise clients on Google Analytics 4 and Search Console setup, building data-driven marketing habits and tracking what actually moves the needle.

Sault College

WEB APPLICATIONS & BUSINESS APPLICATIONS INSTRUCTOR

September 2023 – June 2024

- Designed and delivered curriculum for Web Applications and Business Applications Development courses covering modern frameworks and real-world workflows.

- Maintained strong course completion rates through inclusive, adaptive teaching strategies that met diverse learning styles and backgrounds.
- Incorporated current industry tools and trends into course material through ongoing professional development, keeping content practical and up to date.

SSM Innovation Centre

JR PROGRAMMER

January 2022 – June 2023

- Accelerated ramp-up on a complex C# / .NET codebase, contributing meaningful features and bug fixes within the first weeks on the project.
- Independently diagnosed and resolved complex technical problems, demonstrating strong command of algorithms, data structures and debugging methodology.
- Collaborated effectively in an Agile team – participating in sprints, standups and retrospectives while maintaining consistently high code quality.

Sault College

COMPUTER PROGRAMMING TUTOR

September 2021 – April 2022

- Provided targeted one-on-one and small-group tutoring for Computer Programming students, helping learners close knowledge gaps and improve their grades.
- Diagnosed individual learning needs and adapted support strategies accordingly, resulting in measurable improvements in comprehension and exam performance.
- Built trusted relationships with both students and faculty, acting as a bridge that kept at-risk students engaged and on track.

SSM Innovation Centre

JR SOFTWARE DEVELOPER (CO-OP)

April 2021 – September 2021

- Delivered production-quality features in C# and Angular, exceeding typical expectations for an entry-level co-op placement.
- Contributed to code reviews and QA processes from day one, demonstrating initiative and professional maturity early in career.
- Applied coding standards and best practices consistently, producing maintainable code that required minimal rework post-review.

Education

Cégep Limoilou

AEC IN DÉVELOPPEMENT D'APPLICATIONS SÉCURITAIRES
Completing 2026

April 2026

Sault College

ONTARIO DIPLOMA IN COMPUTER PROGRAMMING
Overall GPA 3.8

April 2022

Skills

Backend	C#, .NET, Python, REST APIs, Node.js
Frontend	Angular, React, Next.js, TypeScript
AI & Automation	Agentic AI, LLM Integration, Python Automation, GitHub Actions
Marketing & SEO	SEO, Core Web Vitals, Google Analytics, Schema.org
Databases	MSSQL, PostgreSQL, MySQL, Entity Framework
DevOps & Tools	Docker, Terraform, Git, Linux, Azure
Security	Bug Bounty, Vulnerability Research, OWASP, Burp Suite

Stats

Active bug bounty researcher on Bugcrowd — identified and responsibly disclosed real-world security vulnerabilities in REST APIs and web applications %

Technical lead at SSM Innovation Centre — driving architectural decisions, code quality and developer growth across C# / .NET projects
Freelance web developer and SEO consultant for marketing clients in Mexico — delivering measurable improvements in organic visibility and digital presence

Building with agentic AI — designing LLM-powered automation workflows that reduce manual overhead for businesses and marketing teams

Former instructor at Sault College — designed and delivered Web Applications and Business Applications Development curriculum

Graduated with a 3.8 GPA from Sault College Computer Programming Diploma

Fluent in four languages — English, French, Portuguese and Spanish — enabling seamless collaboration across North American and Latin American markets

Awards

ADnet Award in Memory of Wilfred Lefresne (2022) - Awarded by Sault College for academic excellence in Computer Programming

President's Academic Excellence Scholarship (2021) - Awarded by Sault College for outstanding academic performance

ADnet Award in Memory of Wilfred Lefresne (2021) - Awarded by Sault College for academic excellence in Computer Programming
